

ELECTORAL REGISTRATION SYSTEM

Features:

DIP software included

National Post Code database available

Auto Elector Movement letters

Excellent elector & property search facilities

PROPERTY BASED SYSTEM

The Property is the central controlling database, giving easier control.

FULLY RELATIONAL DATABASES

Includes Polling Districts, Streets, Sub-Streets, Properties and Electors.

FAST ON-LINE REGISTER MAINTENANCE INCLUDING BAR CODING IF REQUIRED

Includes 4 display levels with single key switching. Single key update of register plus bar coding.

SCROLLING DISPLAYS - COLOUR CODED

Full Feature scrolling display of Register with speedy movement to specific Polling Districts, Streets, Properties or Electors.

MULTIPLE SEARCHES FOR DATA

Includes searches by Name, Roll Number, Address and House Name, plus duplicate displays and envelope searches.

MARKED REGISTER VIEWED ON SCREEN

Shows No Change, Deletions, Insertions, U18, Over 70, Absent Voters, EU, Service and Overseas, etc.

PERSONALISED FORMS A OUTPUT

Complete with bar code printing for speed of processing.

FULL FEATURE ABSENT VOTERS MODULE

Covers all aspects of Postal, Proxy and Postal Proxy Voters and includes all necessary reports and envelope printing.

BOUNDARY MAINTENANCE MODULE

Fully automated module includes single key movement of Properties for boundary changes and Register maintenance.

FULL ACCESS TO "CURRENT" & "DRAFT" REGISTERS

Includes both scrolling and individual search features.

URBAN & RURAL REGISTERS

Including mixed Polling Districts if required

INTERFACE TO ELECTION MANAGEMENT SYSTEM

Allows automatic collection of Candidate's assentors and carries out statutory check of Nomination Papers for each electoral area.

PARAMETER DRIVEN OUTPUT FOR REGISTERS

On screen formatting allows different printing requirements such as orientation, size and number of columns.

AUDIT TRAIL

Optional: will record and trace all data entries and amendments.

CANVASS AREAS AND CANVASSERS' DETAILS

Name and address database for loading of canvassers, including Street Attachment facility. For convenient distribution and analysis of Forms A and Poll Cards.

NEW! OPTIONAL NATIONAL POST CODE DATABASE

Locate electors full address AND respective local authority name & address from just the post code for automated movement letters.

DOCUMENT IMAGING

Scanning and storing of A forms. Batch storage, and feature packed quality control program allowing on-screen changes.

HARDWARE AND OS

*Fully 32 bit software
Pentium 4 - 1 Ghz. or better processor, 128 Mb RAM, 1024 x 768 resolution, Windows 95/98/NT. For DIP station, 19" monitor recommended.*
